development**

**COMPANY
PROFILE 2021**

Who we are?

Integrated Building Solutions is a leading company in supply, installation testing and commissioning for all projects requirement in electromechanical systems and smart buildings, which has obtained the international quality certificate **ISO-9001: 2015**.

We are distinguished by our constant keenness to keep up with progress and to use everything new in the world of constructing.

We strive to satisfy customers by choosing the best product with high efficiency and long life, taking into account provision of the best price to the customer and ensuring the rapidity in completing the work.

Therefore, we contracted with the pioneers of international factories and global shipping companies to provide the best services and systems and the latest findings of building technology in the field of mechanical systems HVAC, Plumping and fire in addition to the low current systems.

Why Company

Integrated Building Solutions is your best choice?

Customer satisfaction by balancing product quality, price and shorter delivery time.

Through our deep experience in the labor market, we offer you free recommendation and technical advice from specialists to choose the best product compatible with the needs of your project without paying any additional costs that you do not need.

And more than that it, offers a variety of distinctive after-sales services that include both immediate maintenance and long-term warranty, all at competitive and appropriate prices, which enhances our position in the market and makes us your first choice.
